

SUPPORT FOR THE AMENDMENT

This Preliminary Amendment adds new Claims 28-31. Support for the amendment is found in the specification and claims as originally filed. In particular, support is found in the specification at least at page 11, lines 1-18. No new matter will be introduced by entry of these amendments.

Upon entry of these amendments, Claims 1-31 will be pending in this application. Claims 1 and 20-27 are independent.

REMARKS

Applicants respectfully request early and favorable examination and allowance of the application.

Respectfully submitted,

OBLON, SPIVAK, McCLELLAND,
MAIER & NEUSTADT, P.C.

Serial No: <u>New Application</u>
Amendment Filed on: <u>Herewith</u>

Prior to examination on the merits, please amend the application identified above as follows (marked-up copy of amendments attached):

IN THE CLAIMS

Please add new Claims 28-31 as follows:

28. A process for preparing a polyester resin comprising:
producing 2,6-dialkylnaphthalene from a feedstock by the process of Claim 22;
oxidizing the 2,6-dialkylnaphthalene to form 2,6-naphthalenedicarboxylic acid; and
manufacturing the polyester resin from the 2,6-naphthalene-dicarboxylic acid.

29. A process for preparing a polyester resin comprising:
producing 2,6-dialkylnaphthalene from a feedstock by the process of Claim 22;
oxidizing the 2,6-dialkylnaphthalene to form 2,6-naphthalenedicarboxylic acid;
esterifying the 2,6-naphthalenedicarboxylic acid with methanol to form a 2,6-
naphthalenedicarboxylate; and

manufacturing the polyester resin from the 2,6-naphthalenedicarboxylate.

30. A process for preparing a polyester resin comprising:
producing 2,6-dialkylnaphthalene from a feedstock by the process of Claim 24;
oxidizing the 2,6-dialkylnaphthalene to form 2,6-naphthalenedicarboxylic acid; and
manufacturing the polyester resin from the 2,6-naphthalene-dicarboxylic acid.

31. A process for preparing a polyester resin comprising:
producing 2,6-dialkylnaphthalene from a feedstock by the process of Claim 24;
oxidizing the 2,6-dialkylnaphthalene to form 2,6-naphthalenedicarboxylic acid;
esterifying the 2,6-naphthalenedicarboxylic acid with methanol to form a 2,6-
naphthalenedicarboxylate; and

manufacturing the polyester resin from the 2,6-naphthalenedicarboxylate.
